

FLUID LIFE OIL SKIMMERS

An effective low cost skimmer for removal of oils, grease, fatty acids and scum

**18" FIVE WHEEL
SIDE DISCHARGE
SKIMMER
MODEL 28550**

The Fluid Life Oil Skimmer removes oils, grease, sludge, fatty acids and other contaminants from your water or cleaning solution. Because of the adhesive qualities of these contaminants, they adhere to the slow rotating disc and then are removed by use of spring loaded wiper blades and discharged in a nearby container. Water and cleaning solutions not having an adhesive factor will remain.
